EURAMI (European Aeromedical Institute)

Chairman of International Air Ambulance Standards and Aeromedical Education Germany

1<sup>st</sup> -7<sup>th</sup> August, 2019  
(No Class Sunday 4<sup>th</sup>)

## CCAT Thailand (Foundation Level)

CCAT Foundation Level is designed to give a special opportunity for existing and potential professional to gain, update, refresh and exchange knowledge and skills in transferring patients around the globe, and to achieve a deep understanding and professional approach to patient's transfer with the guidance of experts in aviation physiology, retrieval medicine, intensive care, emergency medicine and prehospital care throughout the 6 days course.

The course is aimed for doctors, nurses and paramedics who are ready or preparing to work as flight medical crew, and for other healthcare professionals who wish to work in the medical evacuation and repatriation services. The course will provide a thorough training in aeromedical transport of ill & injured, retrieval medicine, repatriation and aspects of aerospace medicine concerning medical air travel.

The course addresses relevant issues of the special physical, physiological and psychological stresses which are important in the various transport environments, and describes the conditions which are susceptible during transfer by land and by air and how patients can be safely and efficiently carried. The course includes practical and interactive professional visits.
